

SMOGHOG FEATURES

- ✓ **SMOGHOG self-regulating Power Pack provides continually high collection efficiency over a range of cooking conditions**
- ✓ **SMOGHOG Uni-Cell and GPN cell collection plates aligned more closely than other ESP's resulting in better collection efficiency**
- ✓ **SMOGHOG Uni-cell has more collection plates than comparative ESP's and therefore more filter collection area for better efficiency**
- ✓ **SMOGHOG Uni-Cell face velocity remains constant across all size SMOGHOG's and in line with EN1855-2 efficiency testing @ 0.3µm**
- ✓ **SMOGHOG units can be supplied with remote status lights or BMS outputs**
- ✓ **SMOGHOG units can be combined with UAS ozone generators, UAS odour neutralisation units or carbon modules for odour control**
- ✓ **SMOGHOG units can be supplied with particulate/fire stop impingement pre-filters modules**
- ✓ **SMOGHOG ESP's are extremely cost effective as little as 100 watts of power to achieve 97% efficiency on 3000 cfm airflow**
- ✓ **SMOGHOG the only ESP that has a self- regulating Power Pack drawing a maximum of 0.4mamps other ESP's draw up to 800 times this amount and could be considered to be lethal**
- ✓ **SMOGHOG UNI-CELL and GPN cells have greater collection surface area than comparable competitor cells of the same size.**
